

PECO[®]

CARWASH SYSTEMS

A formula for
SUCCESS

SPECIALIZING IN
CONVEYORIZED
CARWASH EQUIPMENT

The Most Helpful Brand In Car Washing.

PECO is passionately committed to providing great equipment as well as the resources car wash owners need to be successful.

For over 50 years we have served the car wash industry and have been proud contributors to its evolution. The lessons learned from our corporate owned washes, the washes we service in Michigan and our thousands of customers, have enabled us to deliver products and services that truly set us apart.

Our experience has taught us that car wash owners not only need great equipment, but a partner to continually help them grow their business. That's why our singular goal is to be the most helpful brand in car washing.

What Makes Us Different?

1) Equipment tailored to fit any tunnel and any budget

PECO equipment has been engineered for the perfect balance of engineering and flexibility. This allows us to tailor our equipment from great value to top of the line performance.

2) Old fashioned service

As a family business, there is nothing more important to us than being there for our customers. This includes our support during your development process, through the construction and far after you have started washing cars.

3) Real world experience

Unlike most equipment companies PECO operates a service department that cares for car washes all over Michigan. PECO also owns several corporate car washes, which makes us car wash owners, not just suppliers.

4) Complete focus on conveyORIZED car washing.

At PECO we are solely focused on conveyORIZED car washing. This allows us to avoid splitting our focus for other markets like in-bay automatic or self service.

CAR WASH SYSTEMS: **HYBRID**

HYBRID WASHING PROCESS

PECO's hybrid systems combine the best of friction technology with high pressure wash components to guarantee an exceptionally clean vehicle. The hybrid process is a combination of presoak, soap solution, friction equipment and high pressure water. With this combination, the entire vehicle surface is cleaned; even the hard to reach areas of the vehicle are covered in the hybrid wash process. The results are less manual prep labor, lowering per vehicle operational costs and making your customer's wash experience enjoyable and safe.

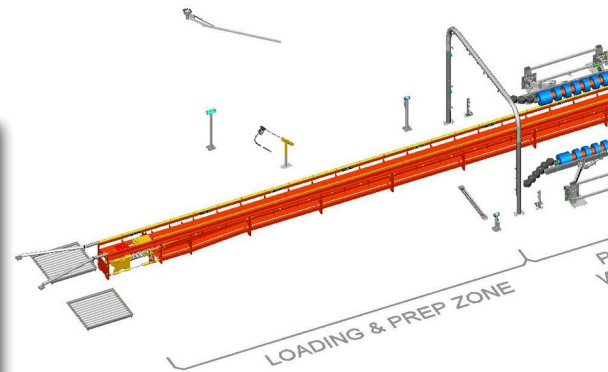

SNF100 SOFT-N-FO

Standard Extra Services:

- Rim Cleaner (friction)
- Undercarriage Flush
- Rust Inhibitor
- Sealer Wax
- Triple Coat Wax

WASHES
up to
130
CARS PER HOUR

[please consult the factory before sizing electrical or water services.]

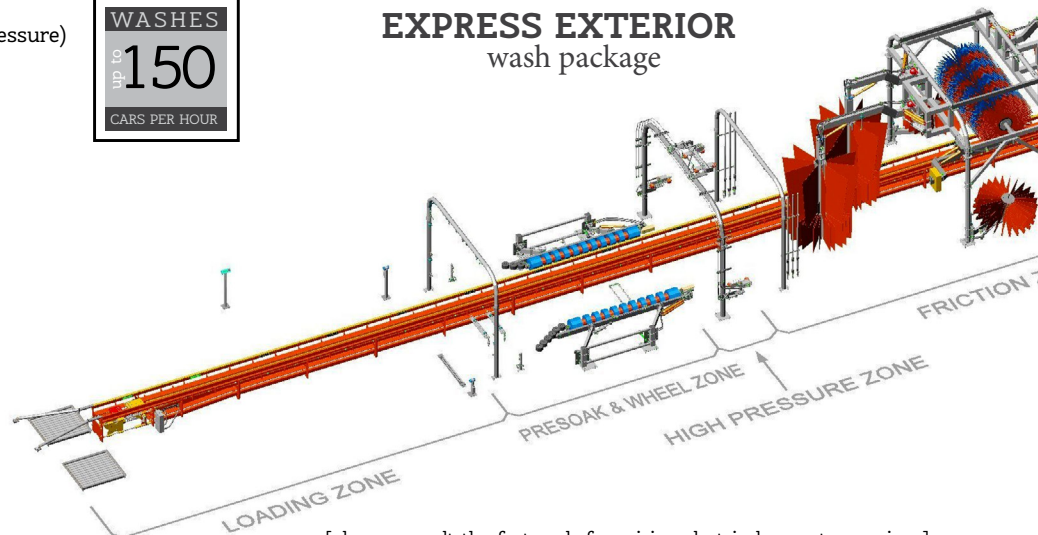

SNF120 SOFT-N-FOAMY SYSTEM

Standard Extra Services:

- Rim Cleaner (friction & high pressure)
- Undercarriage Flush
- Rust Inhibitor
- Sealer Wax
- Triple Coat Wax

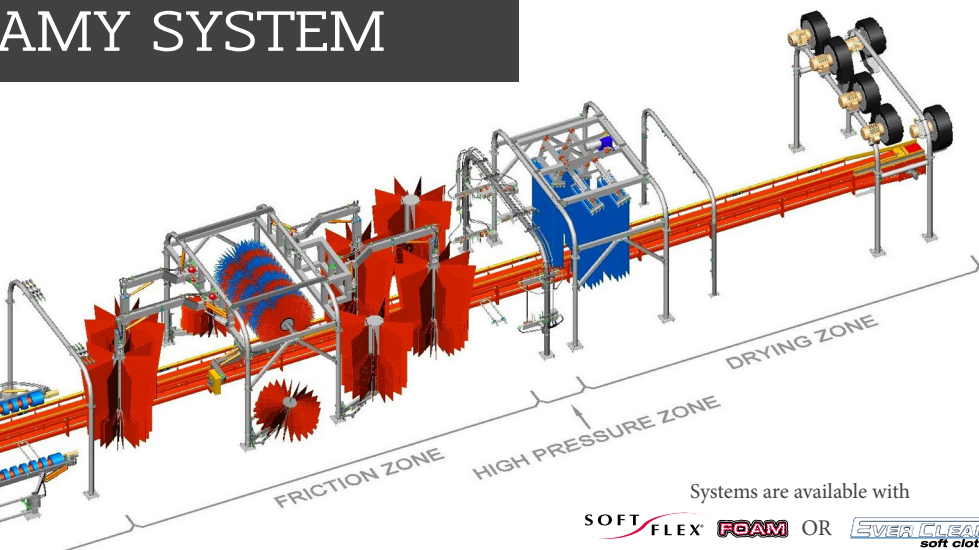

WASHES
up to
150
CARS PER HOUR

The Perfect
EXPRESS EXTERIOR
wash package

AMY SYSTEM

Systems are available with
SOFT FLEX **FOAM** OR **EVER CLEAN soft cloth**

- System Type: Hybrid (combination high pressure & soft cloth)
- Conveyor Length: 100' - Rear Wheel Push
- Minimum Building Size: 75' Long x 16' wide x 12' high
- Vehicle Clearance: 90" High x 90" wide
- Single Phase Electrical: 120VAC @ 60Hz - (6) 15amp Dedicated Circuit
- Three Phase Electrical: 208V @ 60Hz - 360 amp / 230V @ 60Hz - 320 amp / 460V @ 60Hz - 160 amp
- Fresh Water Usage: System - 98gpm @ 40PSI Vehicle - 50gpv @ 80cph
- Hot & Soft Water: Optional
- Reclaim Water: Optional

Systems are available with
SOFT FLEX **FOAM** **EVER CLEAN soft cloth**

- System Type: Hybrid (combination high pressure & soft cloth)
- Conveyor: 120' -Rear Wheel Push
- Minimum Building Size: 125' long x 16' wide x 12' high
- Vehicle Clearance: 90" high x 90" wide (single tire)
- Single Phase Electrical: 120VAC @ 60Hz - (6) 15amp Dedicated circuit
- Three Phase Electrical: 208V @ 60Hz - 550 amps / 230V @ 60Hz - 500 amps / 460V @ 60Hz - 250 amps
- Fresh Water Usage: System - 146gpm @ 40PSI / Vehicle - 59gpv @ 100cph
- Hot & Soft Water: Optional
- Reclaim Water: Optional
- Compressed Air: 27 Delvd. SCFM @ 175 PSI

CAR WASH SYSTEMS: **FRICITION**

SNF50 SOFT-N-FOAM

FRICITION WASHING

Designed specifically for the car wash professional, this system incorporates the features that all friction car washes demand for complete cleaning. Friction washing uses cloth or foam equipment along with soapy water to achieve a clean safe washing process.

WASHES
up to **60**
CARS PER HOUR

The Perfect
MINI-TUNNEL
wash package

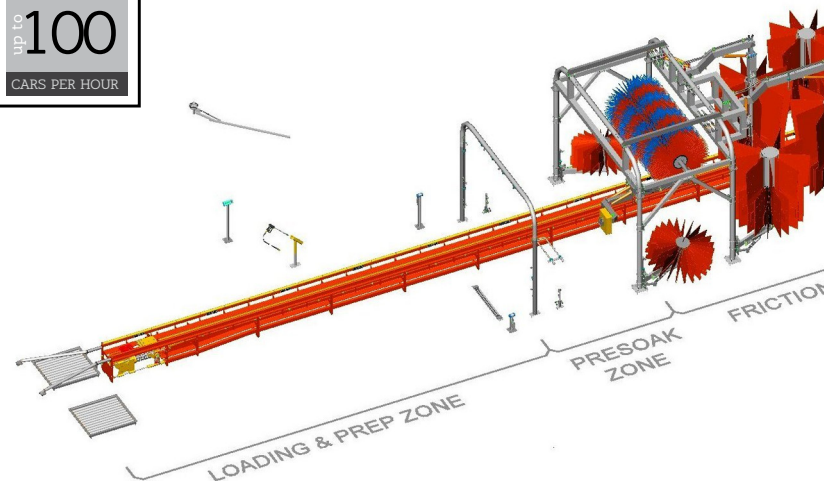

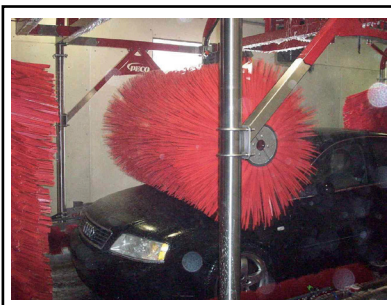

[please consult the factory before sizing electrical or water services.]

SNF90 SOFT-N-FOAMY SYSTEM

Standard Extra Services:

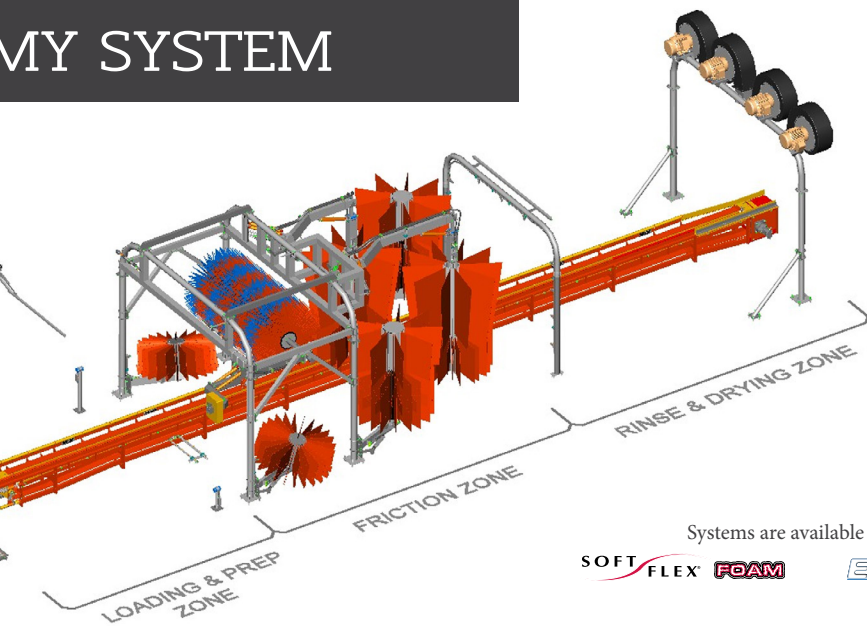

- Rim Cleaner (friction & high pressure)
- Undercarriage Flush
- Rust Inhibitor
- Sealer Wax
- Triple Coat Wax

WASHES
up to **100**
CARS PER HOUR

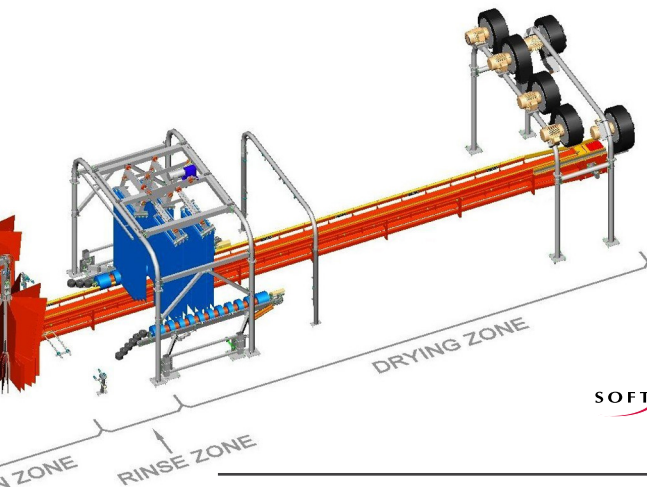

[please consult the factory before sizing electrical or water services.]

MY SYSTEM

Systems are available with
SOFT FLEX **FOAM** **EVER CLEAN**
soft cloth

- System Type: Friction
- Conveyor Length: 50' - Rear Wheel push
- Minimum Building Size: 30' long x 16' wide x 12' high
- Vehicle Clearance: 90" high x 90" high single tire
- Single Phase Electrical: 120VAC @ 60Hz - (3) 15 amp Dedicated
- Three Phase Electrical: 208V @ 60Hz - 225 amps / 230V @ 60Hz - 202 amps / 460V @ 60Hz - 101 amps
- Fresh Water Usage: System - 32gpm @ 40PSI / Vehicle - 23gpv @ 60cph
- Hot & Soft Water: Optional
- Reclaim Water Usage: Optional
- Compressed Air: 27 Delvd. SCFM @ 175 PSI

Systems are available with
SOFT FLEX **FOAM** **EVER CLEAN**
soft cloth

- System Type: Friction
- Conveyor Length: 90' - Rear Wheel push
- Minimum Building Size: 65' long x 16' wide x 12' high
- Vehicle Clearance: 90" high x 90" wide
- Fresh Water Usage: System - 79gpm @ 40PSI / Vehicle - 40gpv @ 80cph
- Single Phase Electrical: 120VAC @ 60Hz - (5) 15 amp dedicated
- Three Phase Electrical: 208V @ 60Hz - 290 amps / 230V @ 60Hz - 270 amps / 460V @ 60Hz - 140 amps
- Hot & Soft Water: Optional
- Reclaim Water Usage: Optional
- Compressed Air: 27 Delvd. SCFM @ 175 PSI

CAR WASH SYSTEMS: **TOUCH FREE**

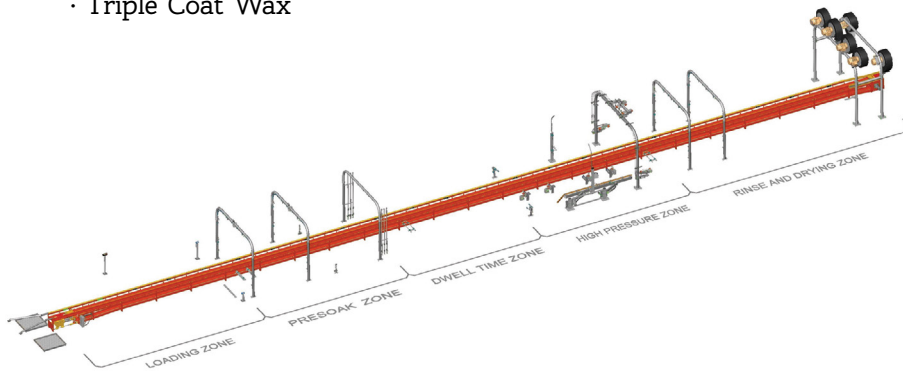

TOUCH FREE WASH

PECO's Trident systems are 100% touch-free systems that deliver unrivaled cleanliness and safety. The first step in the touch-free washing process is a two stage presoak application and dwell time. The second step uses ultra high pressure wash nozzles on various components to achieve superior cleaning. Using only water and solvents, Trident Systems provide impressively clean cars without the use of friction. If it's clean you need and dependability you require in a touch-free car wash system, Trident is the perfect choice.

T120 TRIDENT TOUCH-FREE SYSTEM

Standard Extra Services:

- Rim Cleaner (high pressure)
- Undercarriage Flush
- Rust Inhibitor
- Sealer Wax
- Triple Coat Wax

- System Type: Touch-Free
- Conveyor Length: 120' - Rear Wheel Push
- Minimum Building Size: 95' long x 16' wide x 12' high
- Vehicle Clearance: 90" high x 90" high
- Single Phase Electrical: 120VAC @ 60Hz - (6) 15A Dedicated Circuit
- Three Phase Electrical: 208V @ 60Hz - 530 amps
230V @ 60Hz - 500 amps
460V @ 60Hz - 250 amps
- Fresh Water Usage: System - 160gpm @ 40PSI
Vehicle - 82gpm @ 80cph
- Hot & Soft Water: Required
- Reclaim Water: Optional
- Compressed Air: 27 Delvd. SCFM @ 175 PSI

[please consult the factory before sizing electrical or water services.]

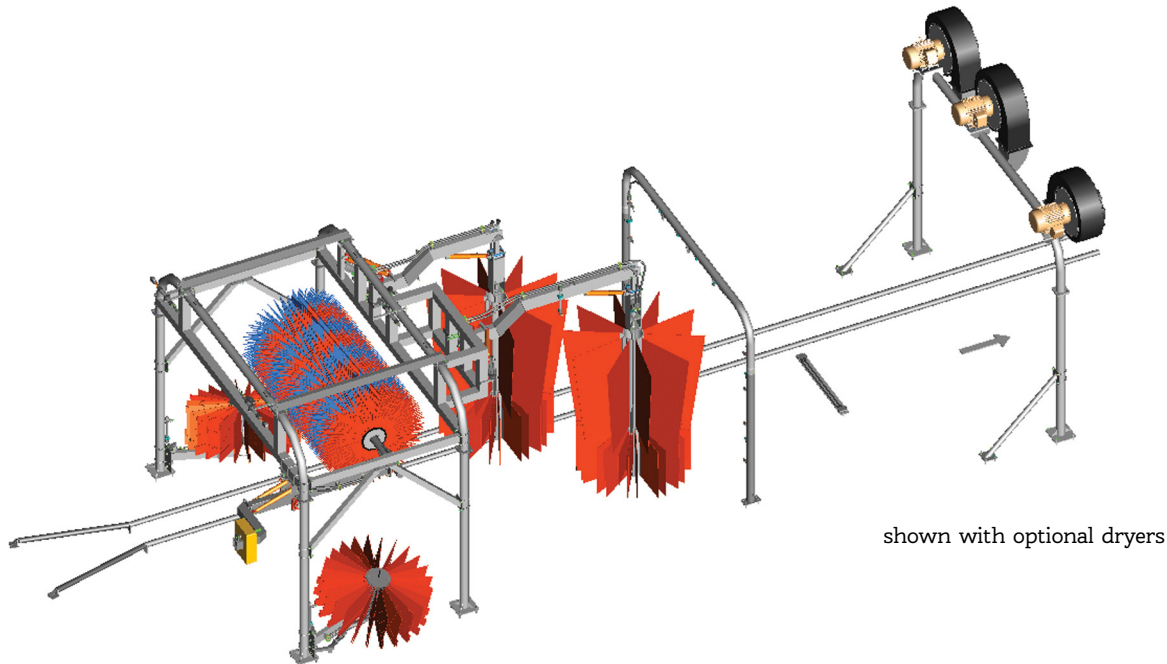

CAR WASH SYSTEMS: **FLEET**

FLEET WASH

Designed specifically for Fleet applications, these drive-thru systems are ideal for use in Auto Dealers, Rental Car Companies, and other fleet car applications. The drive-thru tunnel is simply the most effective way to wash a large number of vehicles on a regular basis. FleetWash Xpress systems handle vehicles up to a height of 90 inches. These systems are activated by a porter/driver that pushes a start button, then proceeds through the wash package on the vehicles own power.

All Systems Include: Push Button Entry, Wash Controls, Choice of Mitter Curtain or Top Brush, Soft Flex Wrap Arounds, Presoak and Rinse Application Arches, Guide Rails.

FWX35 FLEET WASH EXPRESS

shown with optional dryers

- Minimum Bay Size: 35' long x 15' wide x 12' high
- Heated Bay Needed: Maintain Air Temperature of 33°F or above.
- Recommended Floor Drain: 12" x 20' Middle Of Bay. 4" Drain To Sewer.
- Electrical Service: 3-Phase 460V @ 60Hz - 100 amps
230V @ 60Hz - 200 amps
208V @ 60Hz - 220 amps
1-Phase 120 VAC 60Hz 30 amps.
- Water Service: 27 gpm @ 40 PSI.

[please consult the factory before sizing electrical or water services.]

CAR WASH EQUIPMENT

TWO MATERIAL CHOICES:

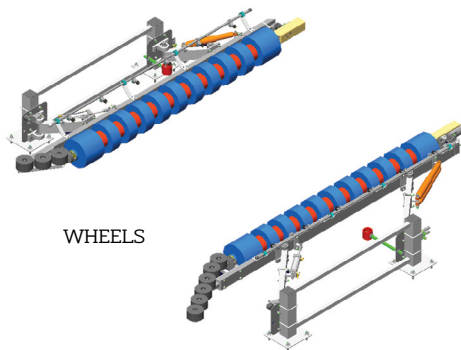

STAINLESS STEEL

The PECO Signature Stainless Steel line combines beauty with strength. The 304 Stainless steel tubing with a brushed finish provides the classic rounded PECO look. The design gives the structure strength to endure years of vehicle washing with minimal upkeep. Stainless steel is resistant to harsh chemicals that can pit and stain raw aluminum materials. Because of the rounded structure, dirt and grime build up is reduced and the finish is easily restored with minimal cleaning. All PECO arches, soft touch cleaning components and high pressure equipment are available in stainless steel – easily the preferred choice of materials used in professional carwashing.

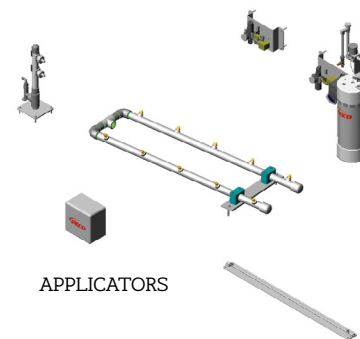

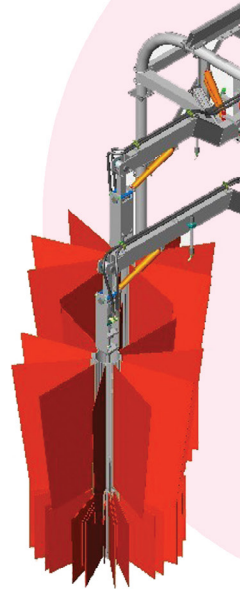

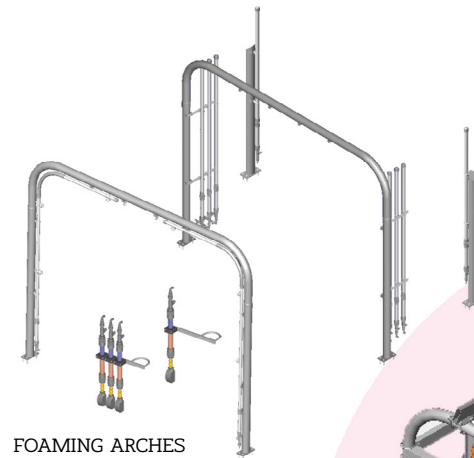

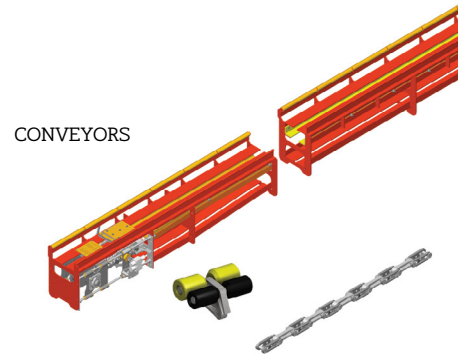

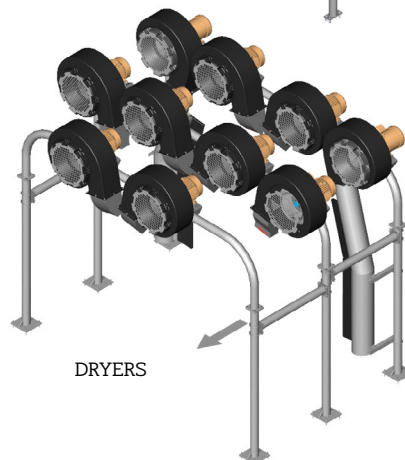

ZINC

A long time standard in the carwash industry is hot dip galvanized. This is a method of protecting steel suitable to withstand the carwash environment. As the name implies, hot dip galvanizing requires complete immersion of the work piece in molten zinc. With flow ports on all PECO equipment, this process ensures a uniform coating with a metallurgical bond.
